

Uni-Directional Tubes

Innovative Products For Your Transferring Needs!!

These patient slings are the equivalent of the best of the competitors' products in the marketplace – they're just more competitively priced.

The Uni-Directional is designed to restrict patient movement in one direction. Once in position the locking material reduces the risk of the patient sliding forward while the low friction material reduces the force required to reposition the patient.

The Uni-Directional helps achieve a proper seating position which in turn promotes proper posture and provides additional comfort, Reduces staff time for repositioning.

Can be used on any seating surface including automobiles.
